

Progettate da soli la vostra area giochi

Tagliate, posizionate, visualizzate... Dar vita alla vostra futura area giochi sarà facilissimo!

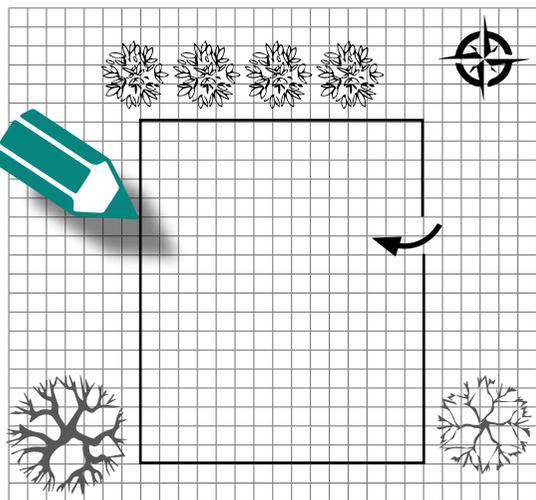

Avrete a vostra disposizione:

- ➔ 2 fogli a quadretti (pagina 39 e 40), con quadretti in scala 1/100
Ogni quadretto 5 x 5 mm = uno spazio reale di 50 x 50 cm
- ➔ Prodotti in miniatura da ritagliare (pagina 41 e 43) - scala 1/100

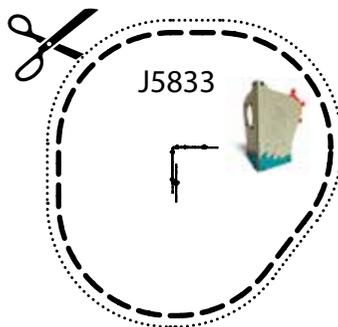

1 Disegnate a matita la zona riservata alla vostra area giochi.

Indicate dove si trovano i punti di accesso, la vegetazione, gli ingombri.
Indicate i punti cardinali Nord e Sud.

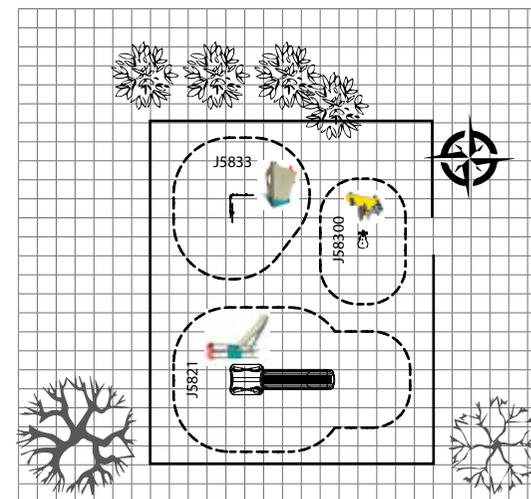

2 Tagliate i prodotti che avete selezionato.

Tagliateli seguendo la linea tratteggiata il più all'esterno possibile.
Il tratteggio interno, dal contorno spesso, simboleggia l'area di sicurezza (vedere pagina 35).

3 Posizionate le miniature tagliate sul piano della griglia quadrettata, nello spazio definito.

Tenete conto dei suggerimenti per l'abbellimento del terreno elencati a pagina 34 e 35.

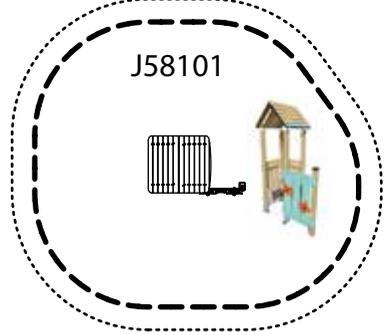

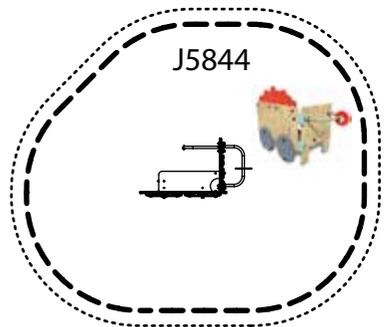

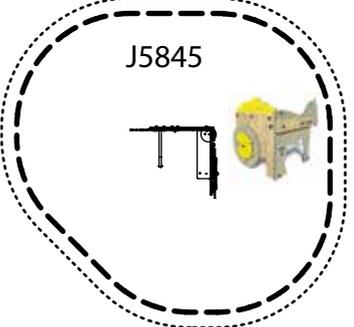

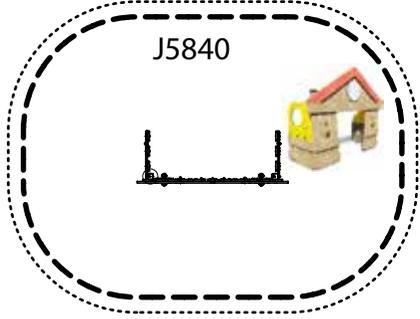

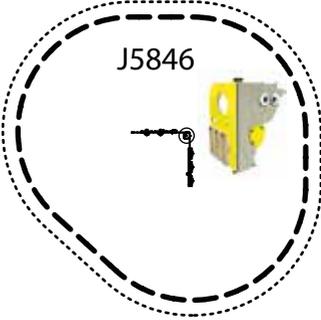

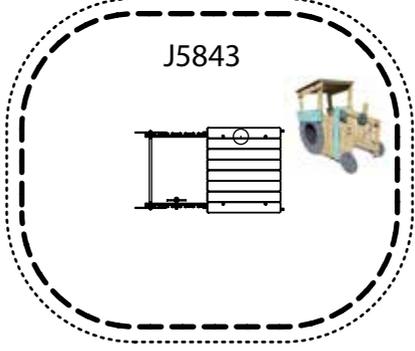

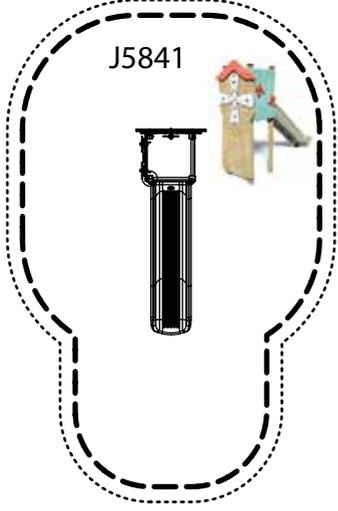

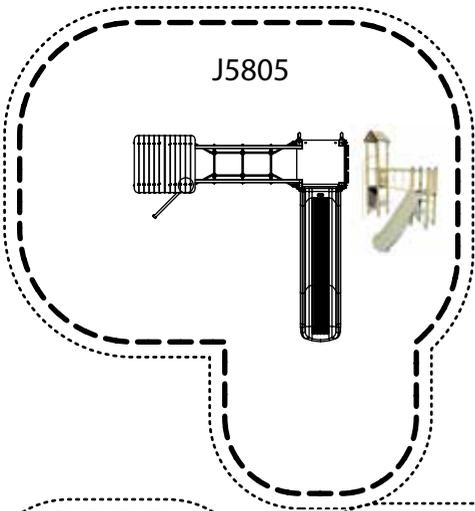

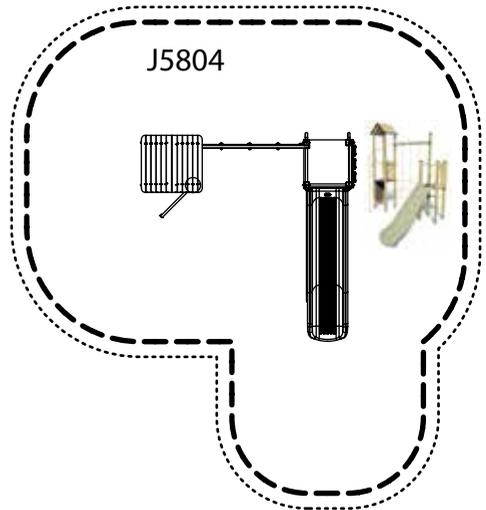

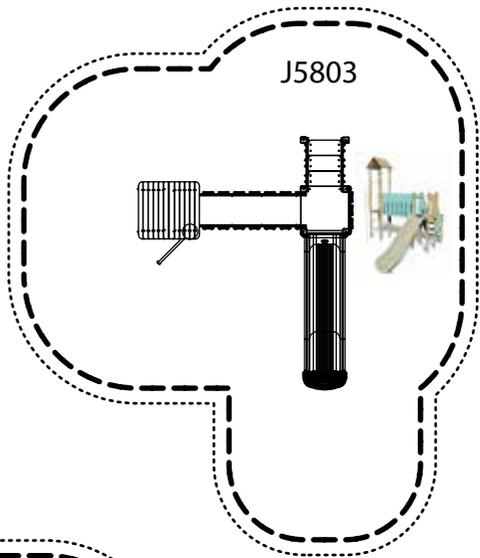

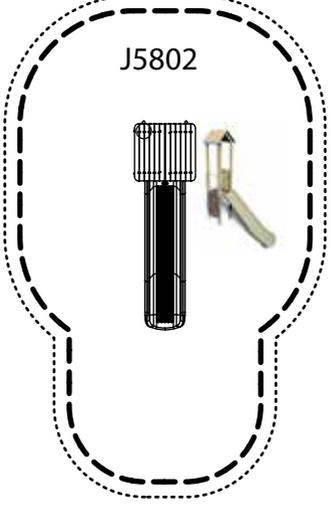

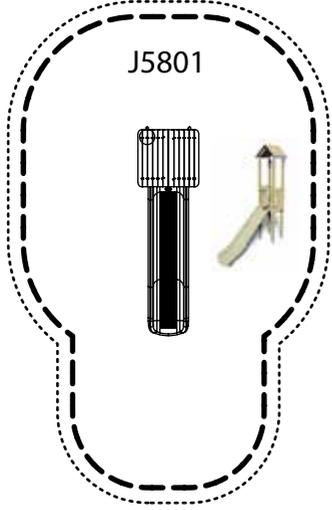

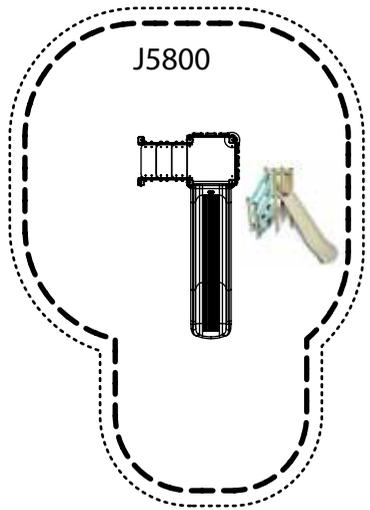

SUGGERIMENTI!

Utilizzate le linee della griglia del piano per determinare il numero di tessere necessarie per l'installazione del vostro parco giochi.
Le dimensioni standard di un ammortizzamento sono 50 X 50 cm (o un quadrato sul piano di griglia).

Contate, aggiungete, moltiplicate... otterrete il numero di lastre da ordinare.

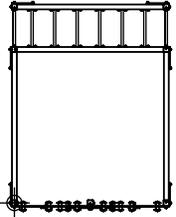

2 Tagliate i prodotti che avete selezionato.
