

The Suspended World

Technical specification

1- **The 125mm diameter post** is made of lacquered galvanised steel. The two-tone grey graining finish has a slightly undulating surface for increased scratch resistance. **The cap** is made of rotary moulded polyethylene.

2- **The tubes** are made of stainless steel guaranteeing lasting durability and reliability of the equipment. **Injection moulded polyamide** fixings connect the posts to the platforms and the various play features.

3- **The 16mm diameter rope** is made of galvanised steel cable covered with polypropylene. Injection moulded polyamide connectors link the cables and keep the nets in shape.

4- **The net fittings** are made of polyamide. The fittings are composed of two distinct parts for ease of maintenance of individual strands.

5- **The pod** is made of 4mm thick polyester. It is a durable material and this ensures its resistance to weathering and UV radiation.

6- **The steps of the catwalk** are made with a non-slip rubber overmould.

7- **The floating steps** are made of shock-absorbing rubber with non-slip surfaces.

8- **The platforms** are made from a textured and non-slip compact material (HPL), 12.5mm thick.

9- **The fixings** are made of stainless steel and protected by anti-vandalism polyamide caps.
