## Technical specification

### J1010

1- **The sliding surface and the platform** are made of stainless steel 2mm thick, which are shaped, bent and rolled from one piece.

2- **The coloured side panels** are formed from a 13mm thick compact material (HPL), providing excellent resistance to weathering and vandalism. The coloured sides are coated with pigmented acrylic polyurethane resin, protecting them from ultraviolet radiation and damage.

3- **The ladder rungs** are made of stainless steel, diameter 40mm, guaranteeing lasting durability and reliability of the equipment.

4- **The fixings** are made of stainless steel and protected by anti-vandalism polyamide caps.
