Technical specification

J1056 / J1057

- 1- **The sliding surface** is made of stainless steel 2mm thick, which are shaped, bent and rolled from one piece.

- 2- **The coloured side panels** are formed from a 13mm thick compact material (HPL), providing excellent resistance to weathering and vandalism. The coloured sides are coated with pigmented acrylic polyurethane resin, protecting them from ultraviolet radiation and damage.

- 3- **The ladder rungs** are made of galvanized steel, diameter 40mm, thickness 2mm, ensuring robustness and durability of the equipment.

- 4- **The platform** is made from a textured and non-slip compact material (HPL), 12.5mm thick.

- 5- **The fixings** are made of stainless steel and protected by anti-vandalism polyamide caps.
