

Themed equipment

Technical specification

J2740

1- **The vertical 95mm square posts** are made of laminated timber, which have not been treated with chrome or arsenic. Splinter-free, the laminate provides great strength and dimensional stability. The posts are protected from wear and tear caused by fungi, insects and termites.

2- **The platforms** are made from a 12.5mm thick, textured, non-slip compact material (HPL).

3- **The tubes** are made of stainless steel, diameter 40mm, guaranteeing lasting durability and reliability of the equipment.

Injection moulded polyamide fixings connect the tubes to the platforms and the various play features.

4- **The gangway floor** is made of solid wood planks, with rubber elements between the planks to avoid all risk of catching a finger.

5- **The ropes** are made of galvanised steel cable covered with polypropylene. Injection moulded polyamide connectors link the cables and keep the nets in shape.

6- **The stainless steel fixings** are protected by polyamide anti-vandalism caps.
