

Meeting point

Technical specification

J2850

1- **The wall panels** are made of aluminium sheet 3mm thick. Their surfaces are covered with two layers of polyester epoxy coating.

2- **The 125mm diameter posts** are made of lacquered galvanised steel. The two-tone grey graining finish has a slightly undulating surface for increased scratch resistance.

3- **The roof, the seats and the table** are made from a 13mm thick compact material (HPL).

Robust in construction, it offers excellent resistance to weathering and vandalism.

4- **The tubes** are made of stainless steel guaranteeing lasting durability and reliability of the equipment.

The various play features are connected to the posts by **injection moulded polyamide fixings** that are non-toxic, non-flammable, shock resistant and ultraviolet radiation resistant. They give the units their sturdiness and help them to stand up to vandalism.

5- **The stainless steel fixings** are protected by polyamide anti-vandal caps.
