

Balancing and climbing equipment

Technical specification

J5405

1- The **125mm round posts** are made of laminated timber, which have not been treated with chrome or arsenic. Splinter-free, the laminate provides great strength and dimensional stability. The posts are protected from wear and tear caused by fungi, insects and termites. The caps are made of injection moulded polyamide.

2- The **tubes** are made of stainless steel, diameter 40mm, guaranteeing lasting durability and reliability of the equipment.

3- The **16mm diameter ropes** are made of galvanised steel cable covered with polyester. The **net fittings** are made of polyamide.

4- The **platform floors** are made from a 20mm thick, textured, non-slip polyethylene material.

5- **Injected aluminium elements** are fixed on the posts with self-drilling screws to provide links between the ropes and the posts.

6- The **stainless steel fixings** are protected by polyamide anti-vandalism caps.
