

Furniture

technical specification

J605

- 1- **The coloured panels** are made with a compact material 13mm thick. It is made up of 70% of softwood fibres and 30% of thermosetting resin, and it stands up to weathering very well (sun, rain, damp, etc.). The coloured surfaces are treated with products based on coloured acrylic polyurethane resins; this enables them to stand up well to UV radiation and resist damage.

- 2- **The table and the seats** are 22mm thick panels made up of alternating layers of birch and pine. The surface is coated with a film of anti-slip phenolic resin.

- 3- **The 68mm square posts** are made of laminated pine which has not been treated by chrome or arsenic. The laminated wood is sturdy, splinter-free and is free from shrinking or swelling. The posts are also protected from wear and tear caused by fungi, insects and termites.

- 4- **The stainless steel fixings** are protected by polyamide anti-vandalism caps.
