

Victoria Way Play Area

Play Area for Local Residents

Client: Fairview Homes

Address: Victoria Way, Charlton, South East London, SE7

Budget: £20,000

Age Range: Under 8's

Project Story

Victoria Way development had little open space to create play spaces for the children living within the development. We had to utilise the small areas of grass to install 'pocket' play spaces that children could easily access from their homes. They also wanted to avoid brightly coloured equipment and picked items that blended in naturally to the development's design.

The Proludic Origin range, which is made from Robinia wood, was used to create a natural look to the external environment. Low-level balance trails and play huts were used in the design to ensure that play complemented the available space and did not dominate the views from people's homes.

The limited free space within the new housing development meant we had to be very clever with the design. Proludic worked with our architect to ensure that a high-quality product was used to blend in with the surroundings and enhance the finished outdoor space for all the residents.

- Andy Tupper, Fairview Homes.

Origin Equipment

Origin is a Robinia wood multiplay equipment range, great for natural settings. Origin has grown from the instinctive desire children have to play and interact with the natural environment. Taking inspiration from the natural environment that surrounds us. Clean product lines, minimal design and essential play activities are all values which form the fundamental principles of the Origin range.
