

Collyhurst Park

Creating A Brand New Community Space for All

Client: Manchester City Council

Address: Collyhurst Park, Manchester, M40 8UT

Budget: £155,000

Age Range: All Ages & Abilities

Project Story

with a local park undergoing development, Manchester City Council wanted to give the local community a space that would reinvigorate the area. The park would include activities for all ages, catering for the whole community. Manchester city council wanted to include a MUGA and also provide an outdoor gym space for adults.

After reading their brief we were very excited by the project! We first researched the history of the site and wanted to ensure we could incorporate this into our submission. we believe in creating a story with every play project. We created a play area which was fun, exciting and dynamic with plenty of play activities. We also installed our outdoor gym range, proludic Urbanix to create an exercise space. With both play and sports equipment, we were able to attract and cater to everyone within the community.

After

Our client was very impressed with the product quality, robustness and installation of all our equipment which now provides inclusive play, fitness and game playing opportunities for the young people living in the Collyhurst Park community, helping to increase activity levels and participation in sport.

- Mark Jones, Area Executive, Proludic

Play Spaces for The Whole Community

Playgrounds provide opportunities for local communities to come together at many different levels. They appeal to all ages, abilities and backgrounds, and they help both children and adults to meet and make friends. Creating a play space for varying age groups also encourages families to be active and have fun together.
