

Multi-Site Refurbishment

New Facilities For The Whole Community

Client: Salisbury City Council
Address: Multi-Site, contact for each site
Budget: £90,000
Age Range: Families & Inclusive

Project Story

Salisbury City Council inherited several existing play areas from their unitary authority. They wanted to enhance and rejuvenate several of these areas as part of one project with new equipment. Each site had to be unique with its own brief to deliver on accessibility, theming and robustness.

Proludic responded to the results obtained during public consultation with a wide range of equipment choices and designs to meet the needs of the local community. This was project managed to deliver a smooth roll out and timely completion of each area.

After

Dealing with Proludic is always a pleasure and they listen to your brief and deliver on it as promised. The sub-contractors used by Proludic were also excellent and a pleasure to work with.

- Mark Annetts, Parks Officer, Salisbury City Council

The Importance of Investing In Play

Play is a process that is freely chosen, personally directed and intrinsically motivated. That is, children and young people determine and control the content and intent of their play, by following their own instincts, ideas and interests, in their own way and for their own reasons. All children and young people need to play. The impulse to play is innate. Play is biological, psychological and a social necessity and is fundamental to the healthy development and well-being of individuals and communities.
