

St Johns Lane Play Area

Redevelopment for St Johns Lane Play Area

Client: Wicken Parish Council

Address: St Johns Lane, Wicken, Milton Keynes, MK19 6BP

Budget: £26,000

Age Range: Families

Project Story

Wicken has an existing play area on the main Sports and Recreational Field that requires updating and refurbishment. Existing Wicksteed Equipment. The client wanted to repaint the existing equipment and add a challenging multi-play unit. Our IXO fit the brief perfectly with the highest monkey bars in the industry standing at 2.4 metres. This specific unit caters for 17 children at one time and offers over 9 different play values. The unit colours look fantastic with the combination of new equipment and the proposed colours for the refurbishment of existing equipment. We painted the existing equipment in a similar grey and green to increase the aesthetics of the area and to compliment the new equipment. We also installed a new inclusive spinning dish for toddlers, a pod swing and a falling star springer.

After

Before

An efficiently delivered project, high-quality products and a well-organised company to deal with. Thank you.

- Councillor Andrew Edmondson, Wicken Parish Council
