

Greenway Open Space, Hillingdon

Transforming a play space with themed play

Client: London Borough of Hillingdon
Address: Yeading Meadows, Uxbridge, UB4 9HP
Budget: £89,000
Age Range: Toddler, Juniors, Families

Project Story

London Borough of Hillingdon were looking to refurbish a tired, old play area. The existing equipment provided no real play value for children and it was time for a change! The play area has been transformed using innovative play equipment. It now has age appropriate multiplay units which allow a high number of children to play together at any one time. The Kidzy unit caters for the under 8's providing play opportunities on large platforms, while the new Kanope multiplay unit challenges the over 8's. New roundabout, seesaw and swings complete the new play area with colourful wet pour surfacing detailing an exciting earth, wind and fire theme!

Before

After

We have been very pleased with the refurbishment work undertaken at Greenway. It was an outdated play area and Proludic's design has brought the play area to life with some great modern equipment.

Kidzy Range

The Kidzy range features simple structures designed for children from two years upwards. It has a colourful visual identity, taking its inspiration from the zen design of Japanese pagodas and gardens. It is characterised by the use of one-piece equipment (roof, slide and floor) which is made of rotomoulded polyethylene, a material well-known for its ability to withstand climate stresses. Slides, tunnels, climbing walls and climbing nets can be attached to platforms at three different heights.
