

Kings Lane Play Park, Windlesham

Beautiful Park Upgrade in a Woodland Setting

Client: Windlesham Parish Council

Address: Kings Lane, Windlesham, Surrey, GU20 6JQ

Budget: £36,000

Age Range: Toddlers, Juniors, Families

Project Story

Kings Lane in Windlesham, Surrey had an existing play area installed over 30 years ago. It was tired, outdated, lacking excitement and as a result became severely under-used. The setting of the park is in a shaded location under large trees, in a residential area, alongside a main road. Large sections of the park are unusable due to the tree roots protruding through the ground. Given the shade under the trees moss growth is rife and as a result - following a competitive selection process - Proludic suggested a steel based option, as opposed to wood, which would encourage further moss growth over time. A multi-play unit from our Kanopé range is now the parks centrepiece - which lends itself to natural settings, but provides a long term and durable solution to wooden equipment.

Before

After

Proludic offered a solution that was sympathetic to the environment and offered long term value for money. Work was carried out in time for the school holidays and took into account neighbours considerations!

Danny Smith - Area Manager, Proludic

The Kanopé product range is inspired by nature. Children can enjoy the play features within this streamlined and modern design. The shapes, materials and colours reflect moving wildlife. The green arched posts simulate grass leaves or tree trunks bent by the wind. The green and oak-tree coloured signs, arched or cut out, replicate everything that the forest can offer. Kanopé invites users to live the adventure at the heart of the forest!
