

# Lybster Community Play Area

Village group inspired to deliver a great play area

Client: Lybster Community Group  
Address: Village Road, Lybster, KW3 6BH  
Budget: £59,000  
Age Range: Toddlers, Junior

## Project Story

Lybster is a small coastal village in Caithness, north of Scotland. As the local play area needed a refurbishment, Lybster Community group worked to raise £60k to build an amazing playground for the children. The winning design included a gigantic 5.4 metre high Amazon themed tower with two slides including the main one that is over 3 metres high and almost 7 metres long! An inclusive roundabout, swings and a climbing hut playhouse were also included alongside interactive play panels.

After

Before

“ We had spoken to four play companies to look for the best design solution from them. After a public meeting to review each presentation, Proludic were chosen. This is one of the most distinctive and challenging play areas in the area and children come from miles around. ”

Madeline Cooper, Treasurer of the Lybster Community Group

# New Play Area

## Themed Equipment

The Adventure themed structures include many details and unique elements on the equipment which allow children to express themselves freely and plunge their imagination into the depths of the Amazon rainforest. The colours, predominantly orange, brown and green, accentuate this trip to the heart of the tropical forest.
